## Profile

I am Lucas, I graduated in Internet Systems Technology from the Federal Institute of São Paulo (IFSP São João da Boa Vista). I am passionate about Front End, with expertise in Vue.js 3. My main tools include Vue.js, Nuxt.js, and Laravel, with a focus on building scalable and high-performance applications. My goal is always to deliver projects that combine functionality, design, and technical excellence. Welcome to my portfolio! Here, you'll find projects that represent my journey and skills. Feel free to explore and learn more about my work.

**Specialties:** Web applications, Software architecture, Nuxt, Vue.js

## Experience

### Community Leader and Content Creator

**Frontend Developer** | [Creators.IIc](#) | 01/2021 - present

Developed web projects using Vue.js and Laravel, taking responsibility for defining the technologies to be used, design standards, documentation, code reviews, version control with Git, and continuous integration. Actively contributed to feature development, participating in refinements by assisting in the creation of functional and technical specifications, and implementing features with a focus on clean code to ensure easier future maintenance. Currently, I maintain the application and implement new features.

Key Technologies: Vue.js, Vuex, Vue Router, Axios, TailwindCSS, Bootstrap, Pinia, Chart.js, Composition API & Options API, Vue Test Utils, and CI/CD.

## Education

**Federal Institute of Santa Catarina (IFSP)** | 2021 - Present
